

A

Pred 6.a — Frontoparietal
bimodal distribution

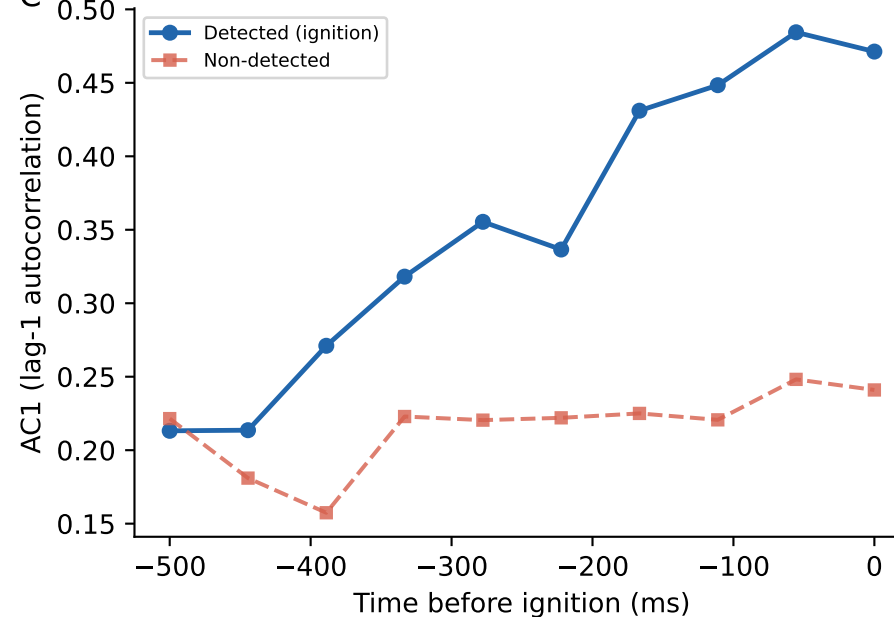

B

Pred 6.b — Regional specificity:
FP bimodal, occipital graded

C

Pred 6.c — Critical slowing:
AC1 $\uparrow$ before ignition
(APGI vs. GWT criterion)

D

Pred 6.d — Gamma coherence predicts detection
(1+2=GNW; +HEP-coh $r > 0.25$ = APGI)
