

A

Biological Constraints $\leftrightarrow$ APGI Computational Requirements
(LSM/LNN as unique simultaneous satisfier)

B

Constraint colours C1-C4 denote biological constraints, not epistemic tiers.

Abbreviation key — LSM, liquid state machine; LNN, liquid neural network; APGI, Allostatic Precision-Gated Ignition; ϵ^e/ϵ^i , excitatory/inhibitory prediction errors; τ_s , decay/accumulation time constant.
