

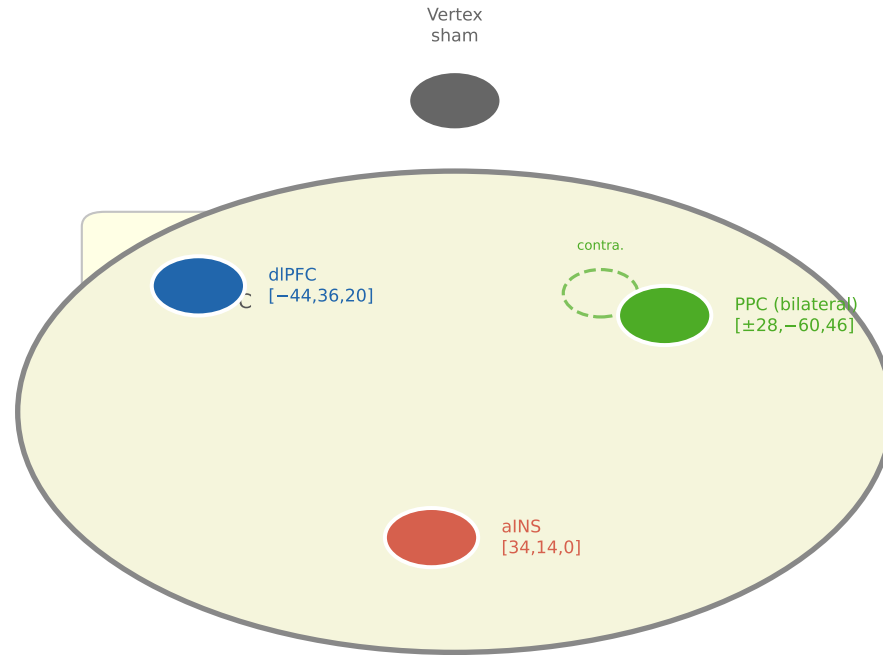

Figure S1 — EP-2 (TMS Protocol) and EP-6 (iEEG Protocol) Schematics
(Paper 2, supplementary; cross-referenced from §5.3 and §5.4)

A

A — EP-2: TMS Targets
(lateral brain surface)

aINS → HEP/P3b dissociation
dlPFC/PPC → global ignition reduction

Deeper substrates including thalamic and claustral contributions are not directly testable by transcranial stimulation; EP-2 constrains only the cortically accessible nodes of the gating network. (§5.3)

B

B — EP-6: iEEG Trial Timeline
(ρ_{res} estimation)
